Career Objective

Computer Science and Engineering graduate with practical experience in Artificial Intelligence, software development, and automation solutions. Seeking an AI Engineer or Software Engineer position to contribute to innovative product development, solve real-world engineering problems, and apply technical expertise in a collaborative technology environment.

Employment History

- 📌 **Softvence Delta, Banasree, Dhaka**
AI Automation Engineer

Apr 2026 – Present

 - ▶ Developed **15+ AI automation workflows** using Python, FastAPI, n8n, JavaScript, and OpenAI APIs.
 - ▶ Built AI solutions for healthcare, digital publishing, lead intelligence, and content automation.
 - ▶ Integrated 10+ APIs including OpenAI, Google, Apollo, Hunter, and Apify to automate business workflows.
 - ▶ Engineered scalable AI systems for workflow automation, data processing, and API orchestration.

Technical Skills

AI Engineering	📌 LangChain, LangGraph, MCP Server, AI Agents, RAG, Prompt Engineering
Backend Development	📌 Python, FastAPI, REST APIs, PostgreSQL, SQL, Database Design
AI Retrieval & Automation	📌 Vector Databases, n8n, AI Workflow Automation
Machine Learning	📌 PyTorch, TensorFlow, Keras, Scikit-learn, Deep Learning, NLP, Computer Vision
MLOps & Deployment	📌 Git/GitHub, Docker, CI/CD, API Deployment, MLflow, DVC, Cloud Hosting (Hostinger)
Data Science	📌 Pandas, NumPy, Matplotlib, OpenCV, Data Analysis, Feature Engineering
Mathematics	📌 Linear Algebra, Calculus, Statistics, Probability, Optimization, Matrix Operations
Programming	📌 Python, JavaScript, SQL, C, HTML5, CSS3
Frontend Development	📌 React.js, Tailwind CSS
Research	📌 Technical Writing, Literature Review, Research Methodology

Projects

- 📌 **Podcast & WordPress Content Automation**

Python, FastAPI, OpenAI GPT, Whisper, n8n, Docker, Hostinger

 - ▶ Automated podcast transcription and content repurposing to generate blogs, show notes, and social media assets.
 - ▶ Built a FastAPI Whisper service and integrated OpenAI GPT for AI-driven content generation.
 - ▶ Developed n8n workflows with Google Drive, Sheets, and WordPress API integrations with duplicate detection.

GitHub: github.com/moonirul/AI-Powered-Podcast-WordPress-Content-Automation
- 📌 **AI Voice Doctor Appointment System**

Vapi AI, FastAPI, React, PostgreSQL, Hostinger

 - ▶ Built an AI voice receptionist for automated appointment booking and patient management.
 - ▶ Integrated Vapi AI, FastAPI, and React to deliver 24/7 healthcare workflow automation.

Live Link: app.pixelstack.cloud
- 📌 **ML Based Diabetes Prediction**

n8n, FastAPI, Scikit-learn, React, Google Gemini API

 - ▶ Built an AI SaaS platform for diabetes risk prediction using ML models and FastAPI, reducing manual assessment effort.
 - ▶ Integrated React, Gemini API, and n8n workflows for automated health insights and efficient processing.

Live Link: diabetes-prediction-amber.vercel.app
- 📌 **AI Resume Builder SaaS**

n8n, Google Gemini API, PDF Generation

 - ▶ Built an AI resume generation platform that reduces manual formatting effort and enables faster ATS-friendly PDF creation.
 - ▶ Automated resume generation, PDF processing, and email delivery using Gemini API and n8n workflows.

Education

- **Green University of Bangladesh**, Purbachal, Rupganj, Narayanganj
BACHELOR OF SCIENCE IN COMPUTER SCIENCE & ENGINEERING
Thesis Title: *Computer Vision-Based Real-Time Air Quality Index Estimation from Ground-Level Images*
Supervisor: Dr. Muhammad Aminur Rahaman **Co-Supervisors:** Md. Zahidul Hasan, Md. Romzan Alam
Feb 2022 – Feb 2026
CGPA: 3.72/4.00
- **Al-Hera Academy School & College**, Bera, Pabna
HIGHER SECONDARY CERTIFICATE (HSC) GPA: 5.00/5.00
SECONDARY SCHOOL CERTIFICATE (SSC) GPA: 5.00/5.00
JUNIOR SCHOOL CERTIFICATE (JSC) GPA: 5.00/5.00

Research Experience

- **Md. Monirul Islam et al.** *Computer Vision-Based Real-Time Air Quality Index Estimation from Ground-Level Images.*
Undergraduate Thesis; Manuscript in Preparation.
Developed a deep learning-based computer vision approach for real-time air quality estimation from ground-level images.
[View Manuscript]
- **Md. Monirul Islam et al.** *Towards Understanding Political Discourse in Bengali Memes: A Vision-Language Approach.*
Research Manuscript in Preparation.
Explored vision-language models for multimodal analysis of Bengali memes using image-text understanding. [View Manuscript]

Teaching & Academic Experience

- **Founder & Educator, StudyWithMoniRuL YouTube Channel** Apr 2026 – Present
 - ▶ Created tutorials on AI, Machine Learning, Algorithms, Programming, and Computer Science concepts.
 - ▶ Explained complex technical topics through structured examples and problem-solving approaches.
- **Mathematics Tutor (Calculus)** 2022 – 2024
 - ▶ Guided students in calculus, mathematical reasoning, and problem-solving techniques.
- **Technical Documentation & Presentation Design (L^AT_EX)** 2024 – Present
 - ▶ Developed IEEE-style reports, technical documents, and presentations using L^AT_EX with citations and visual elements.

Programming & Problem Solving

- **Competitive Programming:** Solved 150+ algorithmic problems across LeetCode and HackerRank, demonstrating proficiency in Data Structures, Algorithms, and computational problem-solving.
- **Coding Profiles:** LeetCode: monirul8888 | HackerRank: monirul_88

Awards and Achievements

- **Department Dean's List Award**, Department of Computer Science & Engineering.
- **Department VC's List Award**, Department of Computer Science & Engineering.
- **Junior School Certificate (JSC) Scholarship**, Board of Intermediate and Secondary Education, Rajshahi.
